

## www.zetacorp.com gets a new look

**April 12, 2008**

**Tucson, Arizona --**

The classic website that has served Zeta Corporation for many years has now been retired. Due to its incompatibility with newer platforms and web protocols, we were unable to update its content in a reliable manner.

If you have visited zetacorp.com in the past, you know that the site contained a wealth of information. We hope that the new site will be easier to navigate; and as we fully develop its content, will serve as an excellent reference into the topic of fouling prevention in aqueous systems.

The new site may be accessed either through <http://www.zetacorp.com> or <http://www.zetarod.com>

**For more information about our technology and patented products, please do not hesitate to contact us:**

**Zeta Corporation  
2045 North Forbes Boulevard  
Suite 102  
Tucson, Arizona 85745
